

Kunnskap for en bedre verden

EVALMEDHELSE

8 April 2025

Torstein Baade Rø
Vice Dean for Research

 **NTNU**
HUNT forskningscenter

30 of 317 research groups evaluated

Do you recognize the findings in the report?

- Good, relevant, no big surprises
- Research as a collective effort, international collaboration
- The importance of clear long-term strategies
- Importance of taking care of young research talents
- The need for more international (EU) funding

Missed aspects?

- Ethics, sustainability
- Balance between fundamental and applied research, implementation, innovation.
 - The importance of fundamental research
 - Larger research organisations must cover the whole value axis.

Surprises

High core organisational funding level (64%)

Shift to competitive funding
at the same time more basic funding is suggested for smaller hospitals and colleges.

The need to improve user involvement

Relevant findings

The need for support for young researchers/research careers

Collaboration, internationalization

More focus on research in the primary health care sector

The potential in health data and registries

Short term implications

Utilization of health data for research

Infrastructure and regulations

Incentives for international funding

New ways for collaboration with private (and public) sector

The use of impact cases

The need for a national learning environment for PhDs
